

UNIQUE'S Midwinter Meet Up

Saturday 12th June to Sunday 20th June 2010

We would like to invite you to a special Midwinter event in aid of **UNIQUE**
a UK charity that supports children affected with a rare chromosome disorder

Let's meet up for

On at Location

There will be a small charge for drinks and food to help us raise funds for the Rare Chromosome Disorder Support Group.

Unique is the UK's only charity for families affected by rare chromosome disorders. We pick up the pieces and make a huge difference to these sick and disabled children and their families. **Unique** has over 7,000 member families worldwide.

We help often severely disabled children and their families, carers and the medical professionals working with them. 1 in 200 babies has a rare chromosome disorder many of whom will be born sick and disabled.

Often unable to walk or talk such special children have a very demanding, lifelong emotional and physical impact on their desperate families who have very little help or the specialised information they need. **Rare chromosome disorders can happen to anyone, anywhere, including to your families.** *Unique*, with its excellent service provision, reduces the isolation of these distraught families and offers very good value for money.

Imagine being told that your very sick baby or grandchild will never walk or talk. Your doctors have little knowledge of rare chromosome disorders and tell you to go away and get on with it. Please support our valuable work, work which is not being carried out by any other organisation in the UK and which meets a real, present and urgent need worldwide.

Rare Chromosome Disorder Support Group

Unique
...but not alone
